

IF YOU DON'T ASK YOU WILL NEVER KNOW

For more than sixty years I have pondered the questions, *who am I? And what am I supposed to be doing with what is thought to be life.* Thru-out all of my trials and tribulations, joys and happiness, successes and failures, those questions were always there. Somehow I believed with all my being that I would at some point receive the answer! Never knowing if I would actually be aware of having receive the answer to the questions I carried with me so reverently. So! With no choice not knowing whether there would even be a next day or even minute I continued on. There have been many number of times I would've sworn that I had received the long sought answer to what I had come to think of as the greatest mystery of existence "*who am I* " and "*what is my purpose*"!

Now! More than sixty years behind me, the noises of life dying down and becoming less hectic I believe I was always receiving answers thru each and every experience I have ever had and continue to have. The answer is and always was upgrade or (**evolution**). Updating my operating system (**awareness**) and installing new drivers (**habits**) in order to function with a new attitude. Because of the diversity of life processes are continually changing and we must always upgrade (**evolve**) to remain relevant. We have to install new drivers (**habits**) if we intend to participate in this ongoing process. By installing the latest operating system we can always be (**aware**) of the changing times.
